

SPECIAL OFFER

**Prevention
deserves attention.**

**Plan for tomorrow
with a scan today.**

Lifestest is a safe, painless and affordable way to detect potential disease within your body through state-of-the-art imaging technology. Countless studies have shown that the best method of prevention is early detection. Our FDA-approved EBT scanner looks at potential problem areas or all areas of your body, while you remain comfortably clothed during a scan in a non-enclosed machine. Plan for your future with a Lifestest scan today!

Lifestest is recommended for anyone over 40 with a family history of heart disease, stroke, cancer or aneurysms. Those with high blood pressure, cholesterol or triglycerides. Smokers and those suffering from diabetes or obesity.
